

EPP40

Description:

Safe organic paint and resin remover that is not highly toxic, flammable, combustible or chlorinated. Readily removes resinous coatings when used in tank stripping. Solvent can be recovered by distillation at 200° C and reused many times. Flash point 197° F.

FEATURES:

- Non-flammable
- Non-chlorinated
- Low vapor pressure
- Non-corrosive
- Water soluble
- Works without heat
- No toxic ingredients
- Capable of vacuum distilling
- Works on a wide variety of resins
- Low evaporation rate

BENEFITS:

- Workplace safety
- Ozone friendly
- Unregulated as to VOCs
- Does not attack metals
- Easy to wash off
- Easily adaptable
- No SARA reporting
- Recyclable
- Multi-purpose
- Negligible product loss

APPLICATIONS:

- Purging of solvent based or water soluble paints from spray guns or lines
- Clean up of semi-cured resins from tools or equipment
- Stripping of defective paint or powder coatings
- Stripping of permanent marking or inks
- Removal of heavy lubricants and many adhesives
- Stripping of resin coatings including: PVC, phenolic, polyester, polyurethane, polystyrene, polycarbonate and epoxy
