

EPD180

Description:

Powerful, mildly alkaline, non-butyl, polymeric degreaser for cleaning all water washable surfaces. Safe, mild on the skin, nontoxic, biodegradable and super-concentrated for economical use. Gives superior cleaning on all surfaces in soak tanks, or by machines. This safe and versatile cleaner is also available in low foam, low pH, and non-phosphate formulations — for different uses and cleaning methods.

FEATURES:

- Non-combustible
- Biodegradable
- Super concentrated
- Mild alkalinity
- Non-corrosive
- Low cost
- Free rinsing
- Unique detergent system
- Non-chelated
- Safe on all metals

BENEFITS:

- Workplace safety
- Sewer disposable
- Long life and lower cost
- Easy on the skin
- Lower disposal costs
- Cheaper than solvents
- No residue after drying
- Works on a wide variety of lubes
- Easier waste treatment
- Care required on aluminum and painted surfaces only

APPLICATIONS:

- Removal of petroleum, synthetic, stearate, honing oils and other lubricants in dip tanks
- Hand-wiping of machinery and equipment to remove greases
- Removal of chlorinated lubricants when used in a hot soak tank
- Hand-wiping of heavy soils before dip-tank cleaning in plating shops
- Replacement for volatile caustic soda in steel mill soak tanks
- Cleaning of small precision machined parts in ultrasonic tanks
- Softening of heat scale for subsequent removal by acid or manual methods
- Cleaning of forming and drawing lubricants from dyes
