

EPD192

Description:

Polymeric, alkaline, non-butyl degreaser with superior corrosion inhibition and soil peptization for soak tank and machine cleaning. Formulated for removing soils containing greases, oils, carbon black, pigments, inorganic fillers and industrial soils at temperatures up to 160° F. Safe on most surfaces. Not for use on highly polished aluminum. This product is low foaming.

FEATURES:

- Biodegradable
- Soil peptizers
- Non-corrosive & non-chelated
- Buffered alkalinity
- Rust inhibited
- Low odor
- Multipurpose

BENEFITS:

- Sewer disposal
- Superior cleaning
- Lower disposal cost & easy on hands
- compatible with all metals & plastics
- Suited to carbon steels
- Workplace acceptance
- Removes oils, greases, carbon & soluble inks & paint

APPLICATIONS:

- Degreasing of machinery and equipment, including oil line clean-out
- Removal of paint pigments from mold surfaces
- Removal of soluble inks from offset presses or inking equipment
- Hand-wiping of large parts or components to remove grease, oil & dirt
- Cleaning of hazardous materials from non-ferrous pump parts before rebuilding
- Heated dip tank cleaning of carbon and other contaminants from recycled automotive parts
- Heated dip tank cleaning of insoluble/petroleum lubricants on bi-metal bearings prior to plating
