

EPD195

Description:

Highly concentrated, non-butyl degreaser which utilizes oil-split detergents, builders, solubilizers, penetrants and nontoxic solvents for superior cleaning. Has the same cleaning performance as the most powerful butyl cleaners but without their odor and skin absorption problems. Features rapid detergency and free-rinsing for labor saving and cleaning. Emulsifies oils to effectively remove them from the surface, which allows them to split from the wash water for easy recovery. Authorized by USDA for use in federally inspected meat and poultry plants.

FEATURES:

- Non-emulsifying
- Less than 10ppm oil in spent cleaner
- Permits immediate skimming
- Modern polymer technology
- Biodegradable
- Aqueous solution
- Non-corrosive and non-chelated
- Rust inhibited
- Buffered alkalinity

BENEFITS:

- Recycling economies
- Can be legally sewered
- Separate disposal of oils & greases
- No Mechanical Action Required
- Nontoxic
- Non-combustible with no VOCs
- Lower cost waste disposal
- Suitable to carbon steels
- Compatible with all metals & plastics

APPLICATIONS:

- Removal of synthetic, stearate and some chlorinated lubricants & waxes
- Removal of water-based inks and paints
- Removal of soluble coolants from parts
- Non-streak cleaning of stainless steel parts
- Removal of all petroleum based lubricants from parts in heated dip tanks
