

EPF200

Description:

Environmentally safe and very effective biodegradable defoamer without any free silicone or mineral oils. Excellent for sewage treatment foams, industrial waste and detergent foam control. Excellent for use in spray cabinets and high pressure washing to reduce foam. Contains organic defoamers and silane treated hydrophobic silica that do not affect paint adherence or finishing operations. Controls all foams from sewage, plant effluent and cleaners.

FEATURES:

- Biodegradable
- Water-based
- Organic defoamer
- Silane-hydrophobic Silica
- No free silicone or mineral oils

BENEFITS:

- No hazardous ingredients
- No fire risk and worker friendly
- Will not affect adherence of paint or plating
- Prevents spotting and diminished coverage
- No hydrocarbon pollution

APPLICATIONS:

- Sewage treatment system defoaming
- To prevent over-foaming in automatic, spray cabinet washers
- To prevent excess foam in high-pressure, spray-wand washing operations
- To reduce foaming in plant effluent streams
