

EPD217

Description:

Soft metal degreaser, same as EPD 201, except with very low alkalinity and many additional corrosion inhibitors. For cleaning soft metals like aluminum, magnesium, tin and zinc where no corrosion can be tolerated. Safe for use on all metals, plastics and paints.

FEATURES:

- Non-emulsifying
- Low foaming
- Highly concentrated
- Free rinsing
- Low pH
- Low odor
- Non-corrosive
- Biodegradable
- Multi-use

BENEFITS:

- Recyclable
- Accommodates high pressure spray action
- Long life, lower cost
- No streaks or residue on parts
- Won't tarnish or degrade soft metals
- Workplace acceptance
- Less costly disposal
- Nontoxic, no VOCs
- Dip-tank cleaning or hand wiping

APPLICATIONS:

- Cleaning aircraft parts, including airframes
- Cleaning of aluminum, magnesium, zinc, copper, brass, plastics, iron and steel
- Cleaning of machining oils, coolants and other lubricants and greases from metals or plastics
